December 2014: Focus on applications

[Download the full magazine \(pdf\)](#)

Table of contents

Coverstory

- [20th anniversary: CANopen in the hands of CiA](#)

In November 1994, CiA published the very first version of the CANopen specification: CiA 301 was one of the most successful Esprit research projects. After all this time, CANopen is still unique in many ways.

Applications

- [From doorman to CAN-controlled turnstile](#)
 - [Pilots drive pushback tractors](#)
-

CAN FD

- [Infineon: Up to six CAN FD cores on one micro-controller](#)
 - [CAN FD: Improved residual error-rate](#)
 - [Vector: Secure communication for CAN FD](#)
-

Devices

- [Emtas: CANopen gateways to the Internet of Things](#)
 - [Blink Marine: Ship equipment in construction machines](#)
 - [Elmetric: Detecting and counting unwanted particles](#)
-

Software

- [F&S: CAN driver for Windows with analyzer capability](#)
-

Tools

- [Sontheim: Improving compatibility of Isobus devices](#)
- [Vector: Tips and tricks for the use of CAPL \(part 3\)](#)
- [Gemac: Detecting potential differences](#)
- [TK Engineering: Model-based design of CANopen systems](#)
