

June 2015: Focus on actuators

[Download the full magazine \(pdf\)](#)

Table of contents

Coverstory

- [FZI: Concierge and assistance robot](#)

Assistance robots are still very much in development, but Hollie already has the basics down: it manages complex tasks and supports people in everyday situations. The robot can even reach the floor by bending its body forward.

Applications

- [Sonceboz: The elephant of off-highway vehicles](#)
- [Nord: Filtration process for improved drinks](#)
- [Rise of the service robots](#)
- [Kvaser: Round the world with a green motorbike racer](#)
- [Gigatronik: E-quad: driving e-mobility forward](#)

Engineering

- [Symtavision: CAN timing analysis beyond bus load](#)
- [Phoenix Contact: Electronics first – or housing?](#)
- [3S: Optimized run time behavior](#)
- [Ipetronik: Connecting automotive standards](#)
- [Developments in China increase](#)
