ISOBUS

## Autumn plugfest 2015 in Germany

The AEF nonprofit association organizes the next Isobus plugfest in Woerth (Germany). The two-day event will take place on September 30 and October 1.

PARTICIPATION IN THE AUTUMN ISOBUS PLUGFEST requires a registration with AEF before August 21. The organizer will prepare a test matrix of equipment connections for the plugfest. This is a schedule of connections between each service-type product (e.g. terminals) and each client-type product (e.g. implement controllers) for a fixed amount of time. To be included in the test matrix, participants must register equipment details by completing an equipment registration form. Participants will have the opportunity to review the test matrix in the beginning of September before it is finalized.
