

INTERLIFT 2015

Shaft copying system with CANopen Lift

Wachendorff Automation (Germany) extends the product range of its digital shaft copying system Silent Move which features CANopen Lift encoders.

THE COMPANY OFFERS A RANGE OF TYPES of its digital shaft copying system on request - circumferential or guided systems, with special nubbed belt or toothed belt, pre-mounted measuring unit, or a complete measuring system. The products are equipped with the company's absolute encoders series WDGA CANopen Lift. These encoders work with the multiturn technology [Endra technology](#), which operates without batteries or gearboxes.

According to the company, the encoders work free of wear and maintenance, which brings increased lifetimes. Wachendorff is exhibiting the product at the Interlift 2015 which takes place from October 13 to 16 in Augsburg, Germany. The company is exhibiting in hall 1 / booth 1101.
