CAN NEWSLETTER MAGAZINE

September 2017: Sensors

[Download the full magazine \(pdf\)](#)

Table of contents

Sensors

- [CAN connectable-sensors look optimistic into the future](#)
- [Siko: Selection criteria for linear and rotary encoders](#)
- [More than an inclinometer](#)
- [The third eye: Lidar systems](#)
- [Advanced vision with mm-wave sensors](#)
- [Ifm: 3D sensors: maneuvering instead of colliding](#)

Applications

- [FTDI: CAN automates crop cultivation](#)
- [Viaico: Assembly station with test equipment](#)

Devices

- [Moba: Connectivity for mobile systems](#)
- [Turck: Robust and talented linguist with brain](#)

Engineering

- [Good to know: CANopen cabling and trouble-shooting](#)
- [Imec: Security architecture for CAN](#)
- [Rohde & Schwarz: DC voltage debugging of an FPGA](#)

Interview

- [The future of CANopen FD](#)
