

CORRECTION

Wrong photos in article

The September issue of the CAN Newsletter magazine is online but unfortunately, an error has crept in.

The September issue of the CAN Newsletter is online since yesterday. With it, an error in one of the articles appeared. We exchanged the photos of Siko's story. Of course we have fixed this problem and made a correction of the article with the correct photos. You can download the new version here: [3/2017: Kerstin Graw \(Siko\) - Selection criteria for linear and rotary encoders.](#)

Of course, the [full magazine](#) includes the updated article now, too.
