EMBEDDED WORLD 2019

CANopen FD at CiA's booth

CAN in Automation (CiA) is as usual part of the Embedded World 2019. In addition to the CANopen FD demonstrator, several CiA members present their CANopen products on the CiA booth.

Annually, the embedded community meets at the exhibition center in Nuremberg for getting an overview on latest developments regarding embedded systems. The international trade show focuses exclusively on embedded technologies. Visitors meet in Germany to get an overview latest product developments, innovations, and trends of the embedded sector.

Again, CiA is part of it in hall 1, stand 630. Its main topic is CANopen FD. The company's engineers update visitors on latest news regarding CAN technology, answer questions, and inform about standardization questions and technical working groups.

The following CiA member companies present their CANopen devices on the well-known product panels: Dunkermotoren, Stegia, Deutschmann, Shanghai Smart Control, Kvaser, SYS TEC, TTControl, ESD Electronics, Helmholz, HMS, Janztec, Proemion, Sontheim Industrie Elektronik, Electrum, Microcontrol, Miunske, ESS Embedded Systems Solutions, Guangzhou Zhiyuan, HMS, Brosa, DIS Sensors, TR Electronic, and Emtas.
