CiA goes Youtube

Since last year, CAN in Automation (CiA) uploads CAN-themed videos on its own Youtube channel. Recently, the company uploaded several webinars in English and Chinese language as well as a range of presentations at CiA technology days with various CAN-related topics.

Due to the coronavirus pandemic, most of the CiA events (1-hour CiA webinars and 4-hour CiA technology days) still take place online. The CiA webinars address decision makers to get a brief overview and introduction into different CAN topics. The CiA technology days provide a summary on trends in CAN technology with some more technical details. In order to give all interested parties access to those online events, CiA records and publishes them on their [Youtube channel](#). Also, in 2021 they will continue doing so with their recorded free-of-charge webinars and technology days.
