

RFID reader-and-writer with CAN interface

The **ILD Pocket-work device by Microsensys (Germany)** optionally comes with a **CAN interface**. It works in a temperature range from **-20 °C to +45 °C**.

THE RFID READER-ANDWRITER SUPPORTS several transponder specifications. It can be used in the fields of maintenance, access control, storage management, product trace, and tracking and process management. The product features one display, three buttons, one battery, one USB, and one Bluetooth interface. It is available as a HF or UHF version. The reader provides a local 16-MiB flash-memory. The IDL engine software package supports the configuration of the device. The German supplier have developed and have manufactured RFID components for 20 years. Besides readers, the firm also offers RFID tags and sensors.
