

Software package supports controller

Epec (Finland) released the MultiTool version 3.0.3 that is compatible with Epec 2024, 2023, 2020, 2021 and 2038 control units. It requires a CANopen stack and the Codesys 2.3 runtime (2.301.46) environment.

THE PROGRAMMING TOOL HAS ADDITIONAL support to EPC-i10 HMI controller, 5050-control unit and 2040-color display. It incorporates updated code templates.

Epec provides installation packages for software releases called Software Development Kit (EpecSDK).

The kit comprises updated the updated tool, libraries and Codesys runtime software. There are PLCopen libraries (version 1.0.1) available for all controllers. The latest runtime is compatible with previous MultiTool versions and libraries.
