

Integrated BLDC servo motors (EC motors)

- - Worldwide No. 1 for BLDC motors with fully integrated CANopen controller
 - Integrated motion controller (sinusoidal commutation) for 4-quadrant drive with dynamic positioning
 - By using the integrated motion controller and an integrated rotor-position encoder, even very complex motion profiles can be performed
 - Can be combined with high brakes and gearboxes in the modular system
 - Control through bus or I/Os or stand-alone operation
 - High IP protection against water or contamination
 - Motor sizes available:
 - BG 45 (cont. 91 W, peak 159 W)
 - BG 65 (cont. 120 W, peak 260 W)
 - BG 65 (cont. 236 W, peak 444 W)
 - BG 75 (cont. 450 W, peak 950 W)
 - BG 95 (cont. 1100 W, peak 2600 W)
